

SMALL MONTHLY PAYMENTS LOOK TEMPTING, BUT THEY'LL COST YOU BIG!

Hey, I'm Tyler. I put way too much on my credit card. Now I have to pay it back, *with interest*. The more slowly I pay off the debt, the more expensive it will be.

Amount Borrowed: \$1,000
Interest Rate: 19.5%

Tyler's situation is bad, but it could be worse. If he keeps charging \$100 per month, but pays only the minimum due each time the bill arrives, over six years, he'll pay \$3,294 in interest alone, and he'll still owe \$3,559! Go to SaveAndInvest.org/TylerOnCreditCards for more information.
